Profile Summary

Computer Science Engineering graduate skilled in Python with a strong focus on Frontend Development using the MERN stack to build responsive and user-friendly web applications. Experienced in developing Machine Learning models using Pandas, NumPy, and Scikit-learn, with a solid understanding of data processing and model building. Demonstrates strong problem-solving, teamwork, and leadership abilities through practical experience. Passionate about creating scalable, efficient, and data-driven solutions.

WORK EXPERIENCE

Fingertips Data Intelligence Solutions Pvt. Ltd.(Oct 2025-Present) - Full Stack & Python/ML

- Designed and structured course content, assignments, and real-world projects to enhance practical learning
- Delivered training on Full Stack Development (MERN) and Python for Data Science & Machine Learning
- Guided students in hands-on projects using React, Node.js, MongoDB, Pandas, NumPy, and Scikit-learn
- Explained core concepts of data analysis, visualization, and ML models

Regex Software – MERN Stack Development Intern (Jun 2025 – Jul 2025)

- Developed projects using MERN stack technologies with a focus on scalable web applications.
- Strengthened knowledge of full-stack development workflows, from frontend design to backend APIs.

Samyak IT Solutions – C & C++ Programming Intern(Aug 2024 – Nov 2024)

- Achieved Grade A+ performance, reflecting strong technical proficiency and problem-solving aptitude.
- Collaborated in a guided environment to improve analytical thinking and teamwork abilities.

PROJECTS [GitHub](#)

Portfolio Website [Live](#)

Designed a responsive portfolio using HTML, CSS, Tailwind CSS
Showcased projects, skills, and achievements with clean UI/UX
Deployed on GitHub Pages / Netlify

Flight Price Prediction (Machine Learning)

Built a prediction model using Pandas, NumPy, and Scikit-learn to estimate flight ticket prices
Performed data cleaning, feature engineering, and EDA using Matplotlib and Seaborn
Achieved accurate predictions using regression algorithms and model evaluation techniques

E-commerce Web Application (MERN Stack)

Developed a full-stack e-commerce platform using MongoDB, Express.js, React.js, Node.js
Implemented features like product listing, cart, and user authentication
Deployed application using Vercel / Render for live access

Other Project-

- Employee Management System (C) – A program to store, update, and manage employee records efficiently.
- Bank Account Management System (C++) – A console-based application to manage user bank accounts with deposit, withdrawal, and balance features.
- More projects available on GitHub showcasing Machine Learning and Python-based applications.

TECHNICAL SKILLS

Programming Languages : C, C++ (Object-Oriented), JavaScript,Python,Python(lib)

Web Development : HTML5, CSS3, Tailwind CSS,Bootstrap, SQL ,React.js, Node.js, Express.js, MongoDB ,UI/UX Development(MERN Stack)

Python & Machine Learning : NumPy, Pandas (Data Analysis), Matplotlib, Seaborn (Visualization), Scikit-learn (ML Models)

Version Control & Tools : Git, GitHub, VS Code, Anaconda , Jupyter Notebook, Google Colab , npm , Microsoft Word, Microsoft Teams, LinkedIn, Outlook.

Deployment: Netlify, Vercel, Render.

Soft Skills : Technical trainer, Problem-Solving, Teamwork, Leadership, Communication, Creativity, Quick Learner, Collaboration, Time Management, 3 year CR .

CERTIFICATIONS

Hackathon - Innovative Problem-Solving Event
Intern PE – Professional Internship Experience
IIA Event – Industry Interaction Achievement

SKIT Expo – Startup Showcase 3ed place Award
Samyak – C/C++ Programming Course
G20 Exhibition - Demo idea
Regex Software – MERN Development Course

EDUCATION

Bachelor of Technology (B.Tech), Computer Science Engineering |
Poornima College of Engineering | 2022–2026
Sitapura, Jaipur
